

Create a clear website and complete work flow with clear color and images and all UX and UI guidelines best which will make it represent high quality luxury, bee and NJ. And an award winning designer and content creator and website builder.

Build the site as a premium New Jersey honey house, not a generic farm store: warm, editorial, traceable, and gift-first. The design should make customers feel they are entering a refined seasonal brand where every jar is connected to real hives, real harvests, and a meaningful local story.

Below is a complete creative direction, UX/UI system, site architecture, customer journey, content system, and build workflow you can give directly to a designer, developer, Shopify builder, or use to build yourself.

Brand direction

Recommended brand concept

For this blueprint, use the working name:

Maison Avenoir Honey

New Jersey Harvested. Beautifully Shared.

“Maison” gives it a premium gift-house feeling. “Avenoir” sounds elevated, memorable, and versatile enough to expand from honey into beeswax goods, seasonal gift boxes, apparel, corporate gifting, and experiences.

If you want a more clearly New Jersey name, alternatives include:

- Garden State Hive
- The New Jersey Honey House
- Meadow & Hive
- The Golden Apiary
- Jersey Wild Honey Co.
- Hearth & Hive NJ

- **Field & Frame Honey**
- **The Honeyed Garden**

The brand should feel like:

- A New Jersey seasonal harvest house
- A luxury but approachable food-and-gifting brand
- A modern beekeeper’s studio
- A celebration of gardens, meadows, farms, and local gathering
- A premium alternative to mass-market honey
- Authentic, never fake-luxury or overly rustic

Brand personality

Quality	What it means in design and copy
Refined	Calm spacing, editorial typography, minimal product layouts
Natural	Wax, honey, paper, wood, linen, flowers, glass, hive textures
Local	New Jersey landscapes, seasonal harvest stories, map references
Human	Your beekeeper story, genuine photos, short journal-style notes
Giftable	Beautiful boxes, message cards, elegant checkout and recipient flow
Educational	Simple explanations about honey, hives, bees, seasonality, crystallization
Warm	Gold tones, tactile product images, generous and welcoming language
Modern	Clean mobile UX, strong product photography, QR-powered traceability

Brand voice

Write like a knowledgeable host and beekeeper—not like a health supplement brand and not like a corporate food company.

Use:

- “Harvested in small batches from our New Jersey hives.”
- “A little sweetness for the table, the host, or someone you love.”
- “Each harvest has its own color, aroma, and story.”
- “Naturally crystallized? That is part of real honey.”
- “From our hives to your home.”

Avoid:

- “The best honey ever.”
- “Miracle health benefits.”
- “Superfood.”

- “Cures seasonal allergies.”
- “100% pure” unless you have a clear, substantiated reason to use it.
- Overused phrases such as “Save the bees” with no real brand action behind them.
- Overly cute copy such as “buzz-worthy,” “bee-utiful,” and “honey, honey” everywhere.

Use bee puns sparingly. Luxury needs restraint.

Visual identity

Color palette

The color system should use honey only as an accent. If everything is yellow, the website will look cheap, loud, and farm-market generic.

Color	Hex	Role
Deep Apiary Ink	#1D211D	Main text, header, premium depth
Garden Moss	#465744	Secondary buttons, icons, botanical accents
Harvest Gold	#C98A22	Primary honey accent, price highlights, hover states
Beeswax Cream	#F4EBDD	Main background, warmth, sections
Linen White	#FBFAF6	Product cards, clean content panels
Wildflower Plum	#6F4A52	Limited seasonal accents, gifting, autumn drop
Clay Terracotta	#B76342	Small accent for seasonal banners or CTA variation
Soft Sage	#B9C4AE	Supporting blocks, educational cards
Brass	#A87323	Borders, small details, premium line work

How to use color

- Main website background: **Beeswax Cream** or **Linen White**.
- Navigation: **Linen White** with dark text, or **Deep Apiary Ink** for a stronger luxury launch look.
- Product pages: clean, mostly neutral backgrounds so the honey color becomes the hero.
- Main CTA button: **Deep Apiary Ink** background with **Beeswax Cream** text.
- Hover CTA: **Harvest Gold** background with **Deep Apiary Ink** text.
- Urgency badges: use **Wildflower Plum**, not bright red.
- Use **Harvest Gold** as an accent only: stars, small lines, icons, price details, hover states, batch markers.

Typography

Use an editorial serif + clean modern sans-serif pairing.

Usage	Typeface direction	Recommended option
Headlines	Elegant editorial serif	Cormorant Garamond, DM Serif Display, Playfair Display, Instrument Serif
Body copy	Clear modern sans-serif	Inter, Manrope, DM Sans, Neue Haas Grotesk-style alternative
Navigation/buttons	Clean uppercase or title case sans-serif	Manrope or Inter
Batch details/labels	Monospace or compact sans-serif	IBM Plex Mono, Space Mono, DM Mono

Ideal pairing

- **Headlines:** DM Serif Display
- **Body, navigation, buttons:** Manrope
- **Batch details and coordinates:** IBM Plex Mono

Example:

“The taste of a New Jersey season.”

DM Serif Display, 64 px desktop / 42 px mobile

“Harvested in small batches from our hives and bottled for your table.”

Manrope, 18 px desktop / 16 px mobile

Logo system

Create three logo formats:

1. Primary wordmark

- “Maison Avenoir”
- Serif wordmark with restrained spacing
- Small “Honey House” or “New Jersey” descriptor beneath

2. Seal or stamp

- Circular seal for jar lids, stickers, shipping boxes, QR cards
- Include “New Jersey Harvested,” “Est. 2026,” or real founding year
- Use a simple bee, hive frame, or hexagonal mark

3. Monogram

- “MA,” “MH,” or your actual brand initials
- Used for favicon, social profile, packaging seal, and apparel embroidery

Avoid literal cartoon bee logos. Use a simplified engraved-style bee, a geometric hexagon, a honey drop, an abstract hive frame, or a New Jersey garden symbol.

Image art direction

The website must use **real photos from your operation**. This is one of your greatest competitive advantages.

Hero photography

Your homepage hero should not be a static stock image of a bee on a flower. It should be an emotionally rich scene that immediately shows quality and origin.

Best hero concepts:

- You holding a honey frame at golden hour.
- Fresh honey pouring slowly from a frame or dipper.
- A refined gift box on a weathered New Jersey garden table.
- Bees moving around a flowering field, framed with warm sunlight.
- A cinematic close-up of honey in a glass jar with bee activity blurred in the background.
- A premium still-life: jar, beeswax candle, linen, wooden dipper, meadow flowers, and a handwritten harvest card.

For launch, use an 8–12 second silent or muted looping video:

- Frame lift
- Honey dripping
- Jar filling
- Candle lighting
- Gift box closing
- New Jersey meadow/hive moment

Keep text in a clear safe area. Do not place white text over a busy honey frame.

Required product-photo shot list

Every flagship honey SKU should have at least six images:

1. Primary product shot

- Full jar centered
- Cream or light stone background
- Clear, readable label
- No visual clutter

2. Texture image

- Honey pour from a dipper
- Close-up showing color and viscosity

3. Origin/process image

- Honey frame, hive, extraction, or bottling

4. Lifestyle use

- Honey on toast, yogurt, cheese, tea, fruit, oatmeal, baking, or charcuterie

5. Scale image

- Jar beside hand, mug, spoon, or table setting

6. Gift context

- Gift box, ribbon, personal card, candle, or host-gift arrangement

Use a consistent visual world: warm daylight, muted shadows, natural materials, real texture, and no harsh flash.

Image rules

- Do not use more than 15–20 percent stock photography.
- Never use artificial-looking AI bees, fake honey, distorted glass jars, or overly perfect flowers as hero product proof.
- Do not use yellow overlays over every image.
- Crop lifestyle photography vertically for mobile social reuse.
- Add descriptive alt text to every important image.
- Use WebP when possible and compress images without visibly degrading quality.
- Shopify guidance commonly recommends 2,048 × 2,048 px square images for product photography and roughly 1,920 px-wide images for hero/banner placements; optimize file sizes so high-resolution photos do not slow your store. [\[1\]](#) [\[2\]](#)

Website map

Your primary navigation should remain lean. The main goal is to make it easy to shop, gift, understand the origin, and contact you for bulk orders.

Desktop navigation

Top announcement bar

 Harvested in New Jersey · Free shipping over \$60 · Local pickup available

Homepage blueprint

1. Announcement bar

Purpose: communicate delivery, local availability, seasonal drop, or gift deadline.

Examples:

- Fall Harvest is now available in limited batches.
- Order by December 15 for holiday delivery.
- New Jersey pickup now available in Somerset County.

Keep it single-line. Do not overload it with multiple announcements.

2. Hero

Visual: cinematic beekeeping footage, honey pour, or premium harvest still-life.

Headline:

- The taste of a New Jersey season.

Supporting copy:

- Small-batch honey harvested from our New Jersey hives, bottled with the story of the season still inside.

Primary CTA: Shop the Harvest

Secondary CTA: Send a Gift

Trust line below CTAs:

- Raw & minimally handled · Seasonal harvests · Traceable by batch

3. Proof strip

Use four minimal icon-and-text blocks:

- Harvested in New Jersey
- Small-batch bottled
- Gift-ready packaging
- Local pickup available

Do not clutter this with too many certification-style badges.

4. Featured collection

Section title:

 Start with the harvest.

Show four cards:

- New Jersey Wildflower Honey
- The First Taste Sampler
- The Honeyed Host Gift
- The Seasonal Harvest Trio

Each card needs:

- Strong product image
- Product name
- One-line product descriptor
- Price
- Quick-add button on hover or tap
- “Gift ready” or “Limited harvest” badge when true

5. Origin/story block

Two-column layout

Left: full-height image of your hives, hands holding a frame, or you in beekeeper gear.

Right:

 Not all honey tells you where it came from.

 Ours does.

 We keep our hives in New Jersey and bottle honey in small seasonal batches. Every jar carries a Hive Passport, so you can see the harvest story, the season, and the people behind it.

CTA: Meet Our Hives

6. Hive Passport feature

This is the innovation centerpiece.

Headline:

 Every jar has a story worth scanning.

Show a phone mockup scanning a QR code.

Three steps:

1. Scan the jar.
2. Meet the season.
3. Taste the place.

Include:

- Batch identifier
- Harvest month
- Tasting notes
- Short beekeeper video
- Bee and pollinator updates
- Pairing ideas

CTA: Explore a Sample Hive Passport

7. Gift section

Headline:

 A sweeter way to say thank you.

Feature three gift paths:

- For the Host
- For Someone You Love
- For Clients & Teams

CTA: Build a Gift Box

Secondary CTA: Explore Corporate Gifting

8. Seasonal journal/content

Headline:

 From the hive journal.

Show three article/video cards:

- Why real honey crystallizes
- The story behind this season's harvest
- Three ways to serve wildflower honey

This section supports SEO, trust, and email capture.

9. Reviews

Do not show reviews until you have real ones. At launch, replace this section with “From the First Harvest” customer reactions only when authentic.

Display:

- First name and initial
- City or county, with permission
- Product purchased
- Written review
- Customer photo if supplied
- “Verified customer” only if your review system supports it truthfully

10. Email capture

Headline:

Join the hive list.

Copy:

First access to seasonal harvests, gift drops, hive notes, and local events.

Offer:

Receive the New Jersey Honey Pairing Guide.

Do not immediately lead with 20 percent off. Premium brands need to protect perceived value.

Core page designs

Shop All page

Use filters that match shopper intent:

- Product type
- Seasonal availability
- Gift-ready
- Under \$30
- Under \$60
- Subscription eligible
- New Jersey pickup
- Limited harvest

At the top, include a short brand statement:

Honey for everyday rituals, thoughtful gifts, and tables worth gathering around.

Collection page: Seasonal Harvests

Use a seasonal storytelling layout.

Example copy:

Each season brings a different bloom, a different color, and a distinct expression of New Jersey's landscape. Our harvests are limited by nature, not manufactured to be identical.

Show collection cards with batch notes:

- Spring Wildflower — light, floral, delicate
- Summer Meadow — rich, rounded, golden
- Autumn Harvest — deeper, warm, earthy

Only use descriptions that are truthful to your actual honey and harvest.

Product page

The product page is where luxury, trust, and conversion meet.

Above the fold layout

Left side:

- Large zoomable primary image
- Thumbnail gallery
- Video thumbnail
- Gift-context image
- Honey texture photo

Right side:

- Product title
- Small batch/season line
- Price
- Review stars
- Short tasting notes
- Jar-size selector
- Subscription toggle, if applicable
- Quantity controls
- Add to bag button
- "Send as a gift" toggle

- Local pickup note
- Delivery estimate
- Payment options

Recommended product-page copy example:

New Jersey Wildflower Honey

Late Summer Harvest · Batch NJ-26-08

A warm, golden honey with soft floral notes and a rounded finish—harvested in small batches from our New Jersey hives.

Tasting notes: Wildflower · Warm caramel · Meadow bloom

Best with: Tea, cheese boards, morning toast, roasted carrots, and gifts worth remembering.

Below the fold

- Story of the harvest
- “What raw and minimally handled means to us”
- Hive Passport block
- Ingredients and food information
- Storage and crystallization information
- Shipping/pickup information
- Frequently bought together
- Reviews
- Related journal article

Avoid horizontal tab designs that hide important content on mobile. Baymard research flags horizontal product-page tabs as a common usability problem; use stacked accordion sections that preserve page flow and are easy to scan. ^[3]

Gifts page

The Gifts page should be built for occasions, not just product categories.

Headline:

Send a taste of New Jersey.

Shop by occasion:

- Thank You
- Host & Hostess
- Housewarming
- Holiday
- Client Appreciation

- Weddings & Events
- New Baby
- Just Because

Every gift card should include:

- What is inside
- Price
- Gift-message availability
- Shipping/pickup note
- “Best for” occasion
- Estimated arrival guidance
- Gift-ready badge

Corporate gifting page

This page needs to feel like a premium B2B service, not a wholesale contact page.

Hero headline:

Gifts your clients will actually remember.

Supporting line:

Locally harvested New Jersey honey and beautifully packed gift boxes for client appreciation, employee recognition, events, closings, and seasonal giving.

Primary CTA: Request a Gift Proposal

Secondary CTA: Order a Sample Box

Show:

- Gift styles from 10 to 500+ units
- Custom message cards
- Co-branded insert cards
- Custom box sleeves for larger orders
- Multi-address shipping
- Local hand delivery for select New Jersey orders
- Event favors
- Timeline and lead-time guidance
- Client testimonial or use-case story when available

B2B form fields:

- Full name

- Company
- Email
- Phone
- Quantity range
- Desired delivery date
- Budget per gift
- Recipient type
- Number of delivery addresses
- Branding needs
- Gift message
- Notes

Our Hives page

This is your trust and founder page.

Headline:

 The work behind every jar.

Include:

- Why you became a beekeeper
- Your approach to hive care
- Seasonal hive calendar
- Real photography and videos
- What customers can expect in honey variations
- Bee health and responsible practices
- Honest note about what you do and do not control in nature
- Your relationship to New Jersey landscapes and pollinator habitats

Do not claim your bees pollinate every local farm or create broad ecological impact unless you can substantiate it.

Journal page

Use this for SEO, trust, retention, and gift discovery.

Core categories:

- From the Hives
- Honey at Home
- Gift Guides

- New Jersey Seasons
- Pollinator Notes
- Recipes & Pairings

Best launch articles:

1. “Why Does Real Honey Crystallize?”
2. “How to Store Honey Properly.”
3. “What ‘Raw’ Means at Maison Avenoir Honey.”
4. “A Guide to Gifting Local New Jersey Honey.”
5. “Five Easy Honey Pairings for a Better Cheese Board.”
6. “The Story of Our First New Jersey Harvest.”
7. “How to Build a Thoughtful Corporate Gift Box.”
8. “Spring, Summer, and Fall: Why Honey Tastes Different Each Season.”

Customer workflow

Direct customer journey

Stage	Customer experience	Your goal
Discovery	Social video, Google search, partner mention, gift recipient, event	Create curiosity and capture traffic
Landing	Clear local story, seasonal visual, Shop and Gift CTAs	Communicate value in seconds
Product discovery	Collections, gift finder, product filters, bundle suggestions	Help shoppers choose quickly
Product confidence	Photography, taste notes, harvest story, QR preview, reviews	Remove doubts
Cart	Gift note, add-on candle, mini jar, free-shipping progress	Raise AOV without friction
Checkout	Guest checkout, delivery/pickup choice, order transparency	Complete purchase easily
Confirmation	Thank-you story, care instructions, referral invitation	Build connection
Post-purchase	Email/SMS education, recipe, review request	Improve satisfaction
Retention	Replenishment, seasonal drop, subscription, gifting reminders	Create repeat purchase
Advocacy	Referral reward, UGC request, event invitation	Earn word-of-mouth

Gift customer journey

1. Shopper clicks “Send a Gift.”
2. They select an occasion: host, thank you, holiday, client, birthday, housewarming.
3. They choose a curated gift box or build their own.
4. They select a message card.
5. They add recipient delivery address or choose local pickup.

6. They choose delivery timing, if supported.
7. They see a clean, gift-specific checkout summary.
8. The recipient receives premium packaging, a note, and a Hive Passport QR card.
9. Recipient scans the code and becomes a future customer.
10. You email the sender: “Your gift was delivered,” plus a future occasion reminder.

Corporate gifting workflow

1. Business visitor lands on /corporate-gifting.
2. They see sample box options, custom options, volume range, and real use cases.
3. They submit the request form or order a sample.
4. You receive a lead in HubSpot, Shopify inbox, Airtable, or your CRM.
5. Automated reply confirms receipt and offers a 15-minute consultation.
6. You send a proposal with product mockups, quantity tiers, branding options, lead time, shipping and delivery plan.
7. Client approves and pays deposit or invoice.
8. Client uploads logo, recipient list, and message content.
9. You send a digital proof for approval.
10. You fulfill, ship, or locally deliver.
11. Client receives delivery confirmation.
12. You request a testimonial and schedule next seasonal campaign.

UX and UI standards

Navigation rules

- Keep the top navigation to six or fewer core choices.
- Make “Gifts” and “Corporate Gifting” visible, not buried in Shop.
- Keep the shopping bag visible at all times.
- Use a sticky header after the user scrolls.
- On mobile, use a clean menu with “Shop,” “Gifts,” “Corporate,” “Our Hives,” and “Journal” first.
- Add site search; shoppers often know they want “honey gift,” “candle,” or “subscription.”
- Use breadcrumbs on collection and product pages.

Mobile-first rules

Most discovery will happen on a phone, especially from Reels, TikTok, local social posts, and Google Maps.

- Place the main product image first.
- Keep “Add to Bag” visible or use a sticky bottom purchase bar.
- Use 44 × 44 px or larger tap targets.
- Show gift options without forcing a customer into a separate complicated funnel.
- Use accordions for details on mobile.
- Do not use small text over images.
- Avoid intrusive popups in the first few seconds.
- Test the entire checkout using one hand on a phone.

Product-page rules

- Show jar size and net weight clearly.
- Never hide shipping or pickup information until checkout.
- State when a seasonal item is limited, only if inventory truly is limited.
- Explain crystallization before customers ask.
- Add one-click pairing and gift add-ons.
- Give visual confirmation when a product enters the cart.
- Use a progress indicator such as “\$14 away from complimentary shipping” only if it is accurate and margin-sound.

Cart rules

Your cart drawer should include:

- Product image
- Quantity control with visible plus/minus buttons
- Gift note option
- Delivery/pickup selection
- Cross-sell one or two highly relevant add-ons only
- Free-shipping progress
- Clear subtotal
- Clear checkout CTA
- Express payment options where applicable

Do not make customers create an account before they can buy. Baymard’s checkout research identifies prominent guest checkout, all fulfillment choices shown together, clearly marked

required/optional fields, and specific adaptive error messages as key usability practices. ^[4]

Accessibility requirements

Build for all customers, not just visually typical desktop users.

- Maintain color contrast that makes text readable.
- Never rely on color alone to show errors, states, or selections.
- Add meaningful alt text to product images.
- Caption all spoken video content.
- Make all menus, product options, and checkout controls keyboard accessible.
- Keep focus states clearly visible.
- Use descriptive form labels—not placeholder-only fields.
- Give specific error messages, such as “Enter a valid ZIP code,” rather than “Invalid input.”
- Allow people to pause auto-rotating motion or avoid it entirely.
- Use semantic headings in logical order.

Accessibility guidance for Shopify stores specifically emphasizes alt text and labels, captions/transcripts, sufficient contrast, keyboard operability, visible focus indicators, readable copy, predictable controls, and clear input assistance. ^[5]

Design system

Spacing and layout

Use a roomy editorial grid.

- Desktop maximum content width: 1,280–1,440 px.
- Standard section padding: 96–140 px desktop.
- Mobile section padding: 48–72 px.
- Product-card gutter: 20–32 px desktop, 12–16 px mobile.
- Card radius: 0–10 px maximum.
- Avoid overly rounded “SaaS-style” cards.
- Use thin brass or moss borders sparingly.
- Let product photography, type, and negative space create luxury.

Button system

Primary button

- Background: Deep Apiary Ink
- Text: Beeswax Cream

- Height: 52–56 px
- Border radius: 2–4 px
- Hover: Harvest Gold background, Deep Apiary Ink text
- Copy: “Shop the Harvest,” “Add to Bag,” “Build a Gift Box”

Secondary button

- Background: transparent
- Border: 1 px Deep Apiary Ink
- Text: Deep Apiary Ink
- Hover: light Beeswax Cream fill

Text link

- Underline on hover
- Small arrow optional
- Avoid too many decorative arrows

Icon style

Use fine-line, hand-drawn-but-precise icons:

- Bee
- Honey jar
- Hive frame
- Gift box
- Map pin
- Leaf
- Truck
- Calendar
- QR scan

Keep line weight consistent and use a maximum of one icon style throughout the site.

Motion design

Motion should feel natural and expensive, never gimmicky.

Use:

- Slow honey-pour video in hero
- Gentle 4–8 px image hover movement
- Fade-and-rise section reveal
- Soft product image zoom on hover

- Subtle cart confirmation
- One restrained bee-flight or dotted path animation on the Hive Passport page

Avoid:

- Constant flying bees across the screen
- Spinning honey jars
- Bouncy buttons
- Excessive parallax
- Auto-playing sound
- Popups that block shopping

High-converting copy library

Hero options

Option 1

The taste of a New Jersey season.
Small-batch honey from our hives, made for your table and the people you gather around it.

Option 2

From our hives to your home.
Raw, seasonal New Jersey honey, bottled with the story of the harvest.

Option 3

Honey worth knowing where it came from.
Meet the hives, taste the season, and send something more meaningful.

Gift section

A little jar. A real New Jersey story.

Thoughtful honey gifts for hosts, clients, celebrations, and ordinary days made sweeter.

Corporate section

Better than another branded mug.

Give clients and teams something local, useful, and genuinely memorable.

Hive Passport section

Meet the harvest behind your jar.

Scan your Hive Passport to see the batch, the season, tasting notes, and life in the hives.

Email signup

Join the hive list.

Get first access to seasonal harvests, gift drops, recipes, and notes from the New Jersey hives.

Technology stack

Recommended build

Need	Recommended choice	Why
Ecommerce	Shopify	Reliable checkout, catalog, inventory, gift cards, local pickup, apps
Theme base	Shopify Dawn customized, Prestige, Impulse, or a custom premium Shopify theme	Fast launch with strong editorial potential
Email/SMS	Klaviyo	Segmentation, browse abandonment, flows, seasonal campaigns
Reviews	Judge.me , Okendo, or Loox	Social proof, photo reviews, review requests
Subscriptions	Recharge, Appstle, or Skio	Seasonal honey club and replenishment
Bundles	Shopify Bundles or a compatible bundle app	Tasting sets, gifts, build-a-box offers
Corporate forms	Typeform, Jotform, Shopify Forms, or HubSpot	Better B2B intake and qualification
CRM	HubSpot Free or Airtable	Manage quotes, leads, sample requests, repeat B2B clients
Analytics	Shopify Analytics, GA4, Meta Pixel, TikTok Pixel	Track conversion, acquisition, and gifting performance
Search	Shopify Search & Discovery	Filters, synonyms, product recommendations
Local pickup	Shopify native local pickup	Clean local buyer flow
QR/Hive Passport	Custom Shopify pages + QR-code generator or dynamic QR platform	Turns each batch into an interactive provenance experience

Do not overbuild first

Do not begin with a headless custom React website, a complex mobile app, or expensive custom software.

Start with:

- Premium Shopify theme
- Excellent custom design system
- Strong product photography
- Great copy
- Gift flow
- B2B lead workflow
- Email automation
- QR-based Hive Passport pages

Then custom-build only after actual customer behavior proves the need.

Email and retention flows

Required automations

Flow	Trigger	Goal
Welcome flow	New subscriber	Introduce hive story and first purchase
Browse abandonment	Viewed product, no cart	Bring back interested shoppers
Cart abandonment	Added to cart, no purchase	Recover revenue with helpful context
Post-purchase	Completed order	Confirm care, usage, and brand story
Review request	10–14 days after delivery	Collect authentic social proof
Replenishment	30–60 days based on jar size	Encourage repeat purchase
Seasonal harvest alert	New seasonal product drop	Create urgency and repeat demand
Gift reminder	30–45 days before key holidays	Drive gifting sales
Win-back	No purchase in 90–120 days	Re-engage former customers
Corporate follow-up	Quote/sample request	Move B2B leads toward order

Welcome email sequence

Email 1: Immediately

Welcome to the hive.
Meet the New Jersey hives and discover what makes each harvest different.

Email 2: Day 2

Why honey changes with the season.
Explain flavor variation, seasonality, and real harvests.

Email 3: Day 4

A jar with a story inside.
Introduce the Hive Passport.

Email 4: Day 6

Honey for tables, gifts, and slow mornings.
Feature your best-selling starter product or gift set.

Email 5: Day 9

The next harvest does not wait.
Add real seasonal availability, if applicable.

Build workflow

Phase 1: Brand and strategy

- Finalize name and domain.
- Confirm your positioning and target customer.
- Define the hero product and first gift box.
- Write brand story, product story, and Hive Passport concept.
- Create logo, color system, typography, labels, packaging, and photography direction.
- Confirm your compliance language for raw honey, ingredients, storage, and claims.

Phase 2: Content production

- Photograph hives, harvesting, extraction, bottling, jars, gifts, candles, and lifestyle scenes.
- Shoot 20–40 short vertical video clips.
- Write all product descriptions.
- Build initial journal articles.
- Create a corporate gifting PDF/catalog later, after the web page and offers are proven.
- Create email copy, FAQs, shipping policy, returns policy, and pickup instructions.

Phase 3: Shopify build

- Set up products, variants, barcodes/SKUs, inventory, and collections.
- Build the home page, collection pages, product pages, gift page, B2B page, story page, journal, and legal pages.
- Configure local pickup, shipping zones, delivery estimates, tax settings, payment methods, gift cards, email capture, and analytics.
- Add review system, email platform, subscriptions, bundles, and search/filtering.
- Build the first three Hive Passport batch pages.
- Test all responsive breakpoints.

Phase 4: Conversion testing

Test the entire path as if you are a customer:

1. Find a product through search.
2. View it on mobile.
3. Select a jar size.
4. Add it to cart.
5. Add a gift note.
6. Choose local pickup.
7. Choose shipping instead.
8. Test checkout as a guest.
9. Trigger a cart error and make sure the message is clear.
10. Complete test orders using each payment option.
11. Open confirmation and post-purchase emails on mobile.
12. Scan your QR code and test the Hive Passport page.

Phase 5: Launch

- Open quietly to your network and local audience.
- Collect real feedback, reviews, and unboxing photos.
- Fix confusing steps before paid advertising.
- Release a limited harvest drop.
- Announce the Corporate Gifting program.
- Publish founder-led video content consistently.
- Add partnerships and local popups only after the website and fulfillment flow are reliable.

Final creative direction

The website should make someone think:

“This is not just a jar of honey. This is beautiful, local, real, and gift-worthy.”

The winning balance is:

- **Luxury:** calm editorial composition, premium packaging, thoughtful typography.
- **New Jersey:** specific seasonal harvest stories, local landscape, real founder presence.
- **Bee authenticity:** actual hives, extraction, bee care, traceable batches.
- **Commerce:** easy shopping, gifting, local pickup, bundles, subscriptions, and corporate orders.
- **Emotion:** sharing, gathering, gratitude, home, and seasonality.

Your homepage should lead with the sensory and emotional idea of a New Jersey harvest—not a generic product grid. Then make buying extremely easy, especially for gifts.
